

# Coal Bunker Technical

**Electrical Outlets:**

The Coal Bunker has 4 non-dimmable 10-amp single phase sockets on the Stage Left wall of the room. These are 3 meters from the ground. The power switches for these sockets are at head high below the sockets.

There are no dimmable sockets in The Coal Bunker.

**Trusses and Rigging Points:**

Above the stage are three wooden beams that can have lighting fixture rigged from them. They do require long C-clamps to fit round the wooden beams.

**Lighting Control:**

The Coal Bunker has a Theatrelight Starlet 12 Lighting Console. The Coal Bunker also has a LF25 Lightfactory 128 DMX channel PC-based lighting USB-DMX dongle. The Coal Bunker has a standard rig which can be found at <https://pumphouse.co.nz/resources/>

**Sound Control:**

The Coal Bunker has a Yamaha MG06 4Ch sound console and a Wireless Handheld Microphone.
